Smart Air-purifier

NatéoSanté, a French company specializing in air quality treatment has launched Eolis, the first intelligent air filtration system especially conceived for the Indian market. Tailored for professionals in home appliances, hospitality and heath/medical sectors, it will incorporate a filter system composed of a medical grade filter HEPA H13 or ULPA U15 and a high density active carbon filter to treat an area of either 60 or 120 m².

The filtration system is equipped with efficient filters to ensure 99.9% purification and the units are silent, easy to use and energy efficient. It includes a monitoring system with three user control interface: touch screen panel and computer or smartphone. Each product gets its own specific ID number for the company to keep a check on its performance and when the filters need to be replaced. It is the first intelligent air filtration system to be marked with CE certifications.

Designer Lights Collection

Tisva, designer home lighting from the house of Usha International Ltd. has introduced its Spring collection 2016 inspired by the concept of Tvisha (light) and Tattva (essence). It includes pendant range made from concrete, designed for ultra-modern rugged interiors. These fixtures come with aluminum reflector on the inside to ensure high efficiency of light with minimal light loss. A few of the chandeliers are complemented with matching wall lights.

The range also introduces, mirror finished dome shape copper pendant with a clean classic silhouette. Featuring a centric-circled aluminum reflector and bulb cover on the inside, it emits just the right amount of light for warm ambience. Large size black & white metal pendants and LED table lamps complete this collection. The LED table lamps equipped with three-level touch dimming function, flexible goose neck and glare free lighting are suitable for work stations.
